

## **FIFRA 2(ee) Recommendation for Application in Conjunction with a Hydrodynamic Cavitation Process for Control of Harmful Algal Blooms**

### **GreenClean Liquid 5.0**

### **EPA Reg. No. 70299-19**

#### Directions for Use:

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This recommendation must be in the possession of the user at the time of pesticide application.
- This recommendation is only for use under the direction of staff of SUNY College of Environmental Science and Forestry.
- Follow all applicable directions, restrictions, and precautions on the product label.
- For control of cyanobacteria (blue-green algae), applications can be made at all sites listed on the GreenClean Liquid 5.0 product label.
- Additional non-pesticidal ingredients may be added to the treatment process.

Application in Conjunction with a Hydrodynamic Cavitation Process: In a batch treatment process, use a metered dosing pump to inject GreenClean Liquid 5.0 into treatment process during the first cycle through the hydrodynamic cavitation device. Add GreenClean Liquid 5.0 at a concentration of 1.4 gallons per acre foot to 28.5 gallons per acre foot.
